IranConMin

The IranConMin has become the largest and most important trade fair for the construction and mining industry in the region, which also attracts more and more visitors. There is a particular focus on the mining sector, which has traditionally been of major significance in Iran. The country has huge deposits of iron ore, copper, zinc and natural stones.

The last IranConMin took place under strict hygiene and safety conditions in February 2021. With 122 Iranian exhibitors on 14,000 square meters of exhibition space the industry presented successfully the latest products and services for the local construction and mining sector. Due to the travel restrictions because of the global COVID-19-pandemic, no international exhibitors were able to attend the trade fair this time.

Join the IranConMin and benefit from the unique procreative synergy of industry, politics and research. The 17th edition of IranConMin is planned to take place from 20 to 23 January 2022.

Whom will you meet at next IranConMin?

Experts and decision makers from the following sectors:

- Housing and urban development
- Building and construction
- Road and bridge construction
- Building material industry
- Mining development
- Coal and ore mining
- Architects and consulting engineers
