Venue	Tehran Permanent Fairground, Iran
Application until	15 July 2018
Exhibitors expected	350 from 15 countries
Visitors expected	20,000 trade professionals
Frequency	annually
Website	www.iranconmin.de

Welcome to your business

After most of the economic sanctions imposed on Iran were lifted in January 2016, the trade show saw an increase in exhibitor figures since. Many foreign companies want to make the most of the opportunity to become established in the growth market of Iran and showcased their product portfolios in the region’s biggest mining and construction fair IranConMin.

In the Iranian construction industry, machinery, plants and equipment need to be modernized while in the traffic infrastructure, there is great need for investment in road construction as well as for the expansion and modernization of airports, ports and rail mass transit and mainline systems.

The mining sector is also regarded as a sunrise industry because of Iran’s resource wealth. Since the Near Eastern country wants to extensively expand its metal industry, this will require a comprehensive expansion of mining. For example, Iran has large deposits of iron ore, copper and zinc.

The IranConMin conference and seminar programme is embedded in the trade fair and creates an international communication platform to discuss the opportunities and challenges facing the mining and construction sector or to present latest product developments and trends.

Join the IranConMin and benefit from the unique procreative synergy of industry, politics and research.

Whom will you meet at IranConMin 2018?

Experts and decision makers from the following sectors:

- Housing and urban development
- Building and construction
- Road and bridge construction
- Building material industry
- Mining development
- Coal and ore mining
- Architects and consulting engineers
- Ministries, associations, universities
